

# Appendix A

## North Herts Council Climate Change Strategy

### Proposed Actions 2021- 2026

#### Taking Action

Taking direct action to reduce the Council's carbon emissions.

#### Enabling Carbon Savings

Ensuring that our policies enable citizens and businesses to reduce their emissions

#### Inspiring the Community

Encouraging citizens and businesses to take action to go further and faster is cutting carbon emissions

# TAKING ACTION

## Reducing the Council's own carbon emissions by targeting:

### Council Buildings and Property

Consider thoroughly, and ensure that new system installations are renewable electricity rather than gas-fired, where this is deemed the best option

Consider replacing gas with electricity from renewable sources where appropriate

Ensure no new buildings use gas-fired systems

Explore use of heat pumps (ground source or air source) to provide heating as the technology develops

Continue to identify ways to improve building energy management systems to reduce waste

Improve building insulation and conduct lighting surveys to reduce energy outputs

Increase incorporation of green clauses in leases and licenses for NHDC's property estate (e.g encouraging tenants to consider whole life carbon assessments when selecting construction methods or materials in their leased property)

Build on the environmental, economic, and social sustainability principles presented in NHDC's Property Acquisition & Development Strategy when appraising prospective property acquisitions, to ensure pre-acquisition due diligence is comprehensive and not solely focused on financial drivers

Explore and progress on-site generation of electricity from solar or wind

Explore opportunities for the sustainable heating of swimming pools

## Transport

In accordance with the Council's 2019 resolution, continue replacing all future operational vehicles leased or purchased by the Council with Ultra Low Emission Vehicles (ULEVs) or zero emission vehicles until the last non-ULEV vehicle leases expire (2022); and encourage contractors to adopt similar measures

Begin transitioning to zero emission vehicles as leases come up for expiry from 2025

Reduce staff and Councillor business travel through use of Zoom and similar technologies as much as possible

Reduce staff commuting through home working as much as practical

Explore opportunities around low-emission refuse freighters

Explore the creation of a 5-Year Plan to reduce emissions from the waste fleet

## Offsetting

Quantify how much land we would need to plant trees on to offset 5% of the Council's 2019/20 carbon emissions, and work towards this goal as is feasible, both as area planting and single specimen planting

Seek to retain and preserve scrub and woodland edges to protect trees and maintain natural boundaries to woodlands

Where appropriate, change grass verge cutting regimes to allow more plant species to grow

Create more wildflower areas across the district

Seek to strengthen hedgerows and have them connect fragmented habitats

Explore options for the preparation of an evaluation, updated each year showing:

Carbon savings that have been achieved since the 2019/20 baseline

The savings identified to make progress towards the carbon neutral by 2030 target

The savings still to be identified

**Continue to consult with the public and with interest groups on strategies for achieving zero carbon emissions by 2030**

# ENABLING CARBON SAVINGS

As part of the ‘Sustainable North Hertfordshire’ programme, work to develop and support policies that encourage electric vehicle use and other ‘cleaner air’ initiatives across the district, including:

-  Providing more electric car charging facilities in our car parks
-  Exploring the possibility of making it cheaper for zero emission vehicles to use Council car parks
-  Working with the County Council to improve the provision of on-street Electric Vehicle (EV) charging
-  Working with other public and private entities/ partners to improve provision of EV charging
-  Progressing the implementation of a better cycle network in North Herts, linking the district and beyond
-  Working with the relevant portfolio holders to prepare an annual Electric Vehicle Action Plan

Further to the requirement for all new and replaced taxi vehicles to be ultra-low emissions from 2028, explore how we can support transitions to low emission vehicles before this date and to zero emission vehicles when the necessary infrastructure is in place

Ensure that masterplans and planning applications for new development are designed around streets and routes for active travel (rather than cars) and create walkable neighbourhoods

Explore how a Sustainability Supplementary Planning Document (SPD) could encourage and provide guidance on how new development can use resources more efficiently, reduce carbon emissions, incorporate carbon sequestration measures, and adapt to climate change

Introduce a standard within a Sustainability SPD to support more energy efficiency buildings to the equivalent of Level 4 of the Code for Sustainable Homes

Set out comprehensive planning guidance within a Sustainability SPD on reducing carbon emissions, adapting and mitigating climate change

Require Passivhaus, BREEAM, or similar standards for all developments on land sold by the Council

Explore how a Biodiversity SPD could help to provide a clear ecological network plan, further enhance and create new habitat (e.g. woodlands, grasslands, and hedgerows) within new development and on Council owned land as part of an offsetting strategy to deliver biodiversity net gain

Update the Council's Green Infrastructure Strategy to identify where new green spaces and corridors should be provided as part of new development to support further carbon sequestration, biodiversity, and flood and surface water management

Signpost residents to funding for retrofitting of insulation, heating and energy reduction features to improve the energy efficiency of existing homes

Lobby government to introduce more funding for retrofitting of insulation, heating and energy reduction features, for both privately-owned and social housing

Work with the Herts Waste Partnership (HWP) to investigate how we could secure the use of anaerobic digestion to deal with food waste from 2024

Ensure recycling and waste collection arrangements promote reduction and reuse

Encourage and support community tree planting initiatives

Explore opportunities for Solar schemes for residents, businesses, and community groups – such as those run by West Suffolk Council and South Cambridgeshire Council

# INSPIRING THE COMMUNITY

Enable residents to assess their carbon emissions, comparing them with the district and best practice

Encourage residents to make behaviour changes by highlighting positive actions that can be taken, and informing them of more environmentally friendly options

Encourage alternative models of working to reduce commuting levels across the district

Promote zero carbon construction (timber buildings, offsetting of carbon, etc.)

Run food waste awareness programmes

Run waste reduction awareness programmes and continue to support community plastic free initiatives

Explore opportunities for certification/awards for Green/Sustainable businesses

Explore the possibility of tree planting awards

Consult with the public to identify further means by which the Council can assist the residents and businesses of North Herts to achieve the target of zero emissions across the district by 2050

Develop communications to raise awareness of the benefits of retrofitting of insulation, heating and energy reduction features, and the long-term cost-saving potential
