

# Climate Action Plan

for Vale of White Horse  
District Council

2022-2024

**Vale  
of White Horse**  
District Council

# Foreword

We are really proud to present our Climate Action Plan for 2022-2024. Tackling the climate emergency is a priority for us and this Plan sets out how we will achieve our target of becoming carbon neutral by 2030, with a 75 per cent reduction in emissions by 2025. Actions in the Plan focus on how carbon emissions will be reduced from our services and ways of working by embedding climate considerations throughout, how we will provide our staff with training and skills to integrate carbon reduction in their work, how we will manage our buildings and land by using sustainable best practices, and how important it is to work with our partners and communities to tackle the climate emergency across our district to strengthen our impact.

Our Climate Action Plan is a specific commitment in our [Corporate Plan 2020-24](#). During the engagement on our Corporate Plan residents told us that tackling the Climate Emergency was really important to them which is why our Corporate Plan prioritises climate action through the theme of tackling the climate emergency, and embeds sustainability throughout the other themes. Not only will the Climate Action Plan improve our council operations and services for residents, it will also contribute to the urgent global climate change agenda, which we were so recently reminded of at COP26 in Glasgow, as well as the UK's net zero targets. We also look forward to working in partnership across the county to address our wider district wide emissions, further contributing to UK and international targets.

While a lot of climate action is taking place at the global and national scale, we must also recognise that during the development of this plan, we experienced, and are still living through, the Covid-19 pandemic. The pandemic posed many challenges and impacted the livelihoods of many. Changes as a result of the pandemic have also had positive outcomes for the environment including reduced travel, shopping locally, and enjoying our surrounding nature, all of which contribute to lowering carbon emissions.

Over the past few years we have seen a lot of climate action in our communities. This has included setting up repair cafes and refill stations, planting trees and community gardens. We are grateful for all the work our communities are doing and we will continue to support this work and hope to further build these relationships.

We are lucky to live in a district with green and open spaces and we want to continue to provide a place for our communities to thrive. While we live in a beautiful environment, we are experiencing extreme weather conditions, including flooding, heavy rainfall and hot summers, affecting some residents more than others. Ensuring our policies and plans have climate action at their core will help to address and hopefully improve these situations.

**Cllr Catherine Webber**  
Cabinet Member for Climate  
Emergency and Environment

**Cllr. David Grant**  
Chair of Climate Emergency Advisory  
Committee (CEAC)

**Cllr Emily Smith**  
Leader of Vale of White Horse  
District Council

# Welcome from Simon Hewings, Head of Finance, Vale of White Horse District Council

This Climate Action Plan comes at an interesting time for us – with council budgets more constrained than ever, especially in the midst of the Covid-19 pandemic, addressing the climate emergency will be a challenge. As a council we continue to focus on providing core services for our residents as well as the wellbeing and resilience of our communities, our economic prosperity, and now taking climate action.

Financial implications are at the core of our decision making, and whilst this will always be a priority for us, climate considerations also need to be included to ensure we reach our carbon neutral targets. All our report writing templates will include a climate implications section to ensure we have considered the environmental impact of our work.

This Plan has been written in collaboration across the council to ensure that the actions are honest, feasible and realistic, while also pushing us to make changes and improvements to our services. I have reviewed the actions and believe that through the skills and experience of our staff, working in partnership, lobbying government on this issue, and seeking external funding, we will be able to make an impact locally on this global issue.

We will continue to be open and accountable in all areas of work, this will also apply to how we monitor the progress of our Climate Action Plan and being upfront about any challenges we face. The Plan will be monitored closely by officers and councillors to ensure we are on track to meet our carbon neutral targets.

## Introduction

The purpose of this Climate Action Plan is to outline how the Vale of White Horse District Council will meet its target of becoming a carbon neutral council by 2030, with a 75 per cent reduction in carbon emissions by 2025. This plan focuses on the council's own emissions to ensure our operations and service provision are carbon neutral by our target date, leading by example before focusing on our district target to be carbon neutral by 2045, with a 75 per cent reduction in carbon emissions by 2030.

This Plan presents a set of actions that will help us achieve our target of carbon neutrality through direct initiatives using our statutory powers, strategic policymaking, or by enabling behaviours and working with others. Our vision is for climate action to be embedded throughout all our ways of working and services, to support our communities to do the same, and to work in partnership to make a greater impact on our target.

This Plan first provides policy context to set the scene for climate action globally, nationally and locally, including our climate actions so far, followed by an outline of our strategic approach to climate action, our reporting methods and then our action plan.

**Carbon neutral, or 'net zero carbon', means there is a balance between the carbon emissions released into the atmosphere and the amount of carbon emissions removed from the atmosphere.**

# Policy Context

There are a range of global, national, regional and local policies setting guidance and targets for taking climate action.

Internationally, the United Nations Framework Convention on Climate Change ([UNFCCC](#)) is the United Nations entity responsible for responding to climate change, and oversees the implementation of the [Paris Agreement](#). The Paris Agreement is a legally binding international treaty on climate change which aims to limit the global temperature increase in this century to 2 degrees Celsius, preferably to 1.5 degrees Celsius, above preindustrial levels. It is a landmark treaty as it was adopted by 196 Parties, including the UK, at COP21 in Paris in 2015, bringing nations together to tackle climate change. At COP26 in 2021, the Glasgow Climate Pact urged for more urgent action and financing to meet the goals of the Paris Agreements. Along with this agreement, the UN adopted the Sustainable Development Goals ([SDGs](#)) in 2015 which are a global urgent call to action to achieve a better and more sustainable future for all by 2030. Climate change is embedded throughout the goals, and is specifically addressed in goal 13, take urgent action to combat climate change and its impacts.

Nationally, the [Climate Change Act 2008](#), updated in 2019, commits the UK to a 100 per cent reduction in carbon emissions, or net-zero, by 2050. The Act also resulted in the formation of the [Committee on Climate Change \(CCC\)](#) which is an advisory committee to the government on climate. In 2021 the Government published its [Net Zero Strategy: Build Back Greener](#) which outlines how the UK will manage its carbon budgets and sets out the UK's vision for a decarbonised economy by 2050. The [Environment Act 2021](#) sets legislation to protect and enhance our environment, including policies around waste and recycling, air quality and water resources.

Regionally, the [Pathways to zero carbon Oxfordshire \(Pazco\)](#) report was published in 2021 to address how Oxfordshire can achieve net-zero emissions by 2050. There are also policy documents on specific sectors including the [Oxfordshire Energy Strategy](#), which outlines how the county will be at the forefront of energy innovation to foster clean growth to reduce countywide emissions by 50 per cent by 2030 (compared to 2008 levels) and set a pathway to achieve zero carbon growth by 2050, and the Oxfordshire Plan 2050 which outlines how new homes and infrastructure will be developed across the county while helping to tackle climate change. As a council, we have also signed up to One Planet Oxfordshire, a co-created vision and action plan on the future of a more sustainable Oxfordshire.

Locally, as a council we declared a climate emergency in February 2019. As a result of these declarations, we set our targets to:

- **Be carbon neutral within our own operations by 2030, with an aim for a 75 per cent reduction in carbon emissions in our own operations by 2025**
- **Be a carbon neutral district by 2045, with an aim for a 75 per cent reduction in carbon emissions in the district by 2030**

Our [Climate Emergency Advisory Committee \(CEAC\)](#) was formed in October 2019 to advise on matters relating to the climate and ecological crises, and to recommend actions, policies and practices to reduce damage to the environment to Cabinet.

Climate action was also identified as a priority in our Corporate Plan 2020-2024, with one of the six themes within the Plan being tackling the climate emergency. Work to address the climate emergency is also integrated throughout other themes of the Corporate Plan. Publishing this Climate Action Plan is one of the projects within the Plan. The Climate Action Plan runs in line with the dates of the Corporate Plan and contributes to our strategic vision and operations as a council.

# Our Journey So Far

While this is our first Climate Action Plan, we have already implemented a number of projects and policies that address the climate emergency, including:

The publication of our [tree policy for planting trees on council land](#), supporting the increase of tree planting across our districts

Incorporating carbon neutral and sustainable features throughout our [design guide](#)

Staff contracts have been updated to support working from home from a climate and covid safe perspective

Create a Climate Action Fund to accelerate local action

The 2021 town and parish forum focused on 'climate action – how can we take action together' with the aim to hear from town and parish councils on how they would like to see the climate emergency addressed and what climate action they are taking locally

We have partnered with [Oxfordshire Greentech](#) to support local businesses to reduce carbon emissions

We are implementing flood alleviation schemes to combat risks arising from climate change

# Measuring and Reporting

To measure our progress in achieving our carbon neutral targets, we divided the actions in this Plan into strategic, direct and enabling actions:

Action category	Explanation	Measuring method
<b>Strategic</b>	Strategic actions are those which change our approach to work and the provision of our services to reach our carbon neutral targets, and these changes will result in reductions in carbon emissions over time. These actions include updates to policy and strategy documents to better address the climate emergency, embedding climate considerations in decision making, and providing training to staff to create behaviour change in our ways of working.	While it will be difficult to measure the specific reductions in carbon emissions from each strategic action, overall reductions in the council's carbon emissions will be seen over time in our annual carbon emission baseline report as a result of taking these actions.
<b>Direct</b>	The results of these actions will produce a quantifiable reduction in carbon emissions from implementing a specific project or making a direct change to a service. For example, we will be able to measure the reduction in our carbon emissions from swapping to electric vehicles, or from implementing a new waste management contract.	Emissions from direct actions will be calculated using the glidepath tool, where we will be able to specifically measure the change in emissions over time.
<b>Enabling</b>	Enabling actions are those where we are encouraging and supporting behaviour change across our district by sharing information, advice and guidance. These actions will contribute to an overall reduction in carbon emissions across the council and district.	We will see the impact of our enabling actions through an overall reduction in carbon emissions in our annual carbon emissions baseline report.

These three categories provide us with the methodology to review our reduction in carbon emissions over the next three years. The Plan also includes the specific reporting measures we will be monitoring for progress of each action, including the reporting type of the measure, whether they will be reported on through narrative, narrative with quantitative elements, or quantitative updates. Progress on actions will be monitored quarterly in line with the Council's Corporate Performance Management Framework, and will be reviewed at each CEEAC meeting and reported to Cabinet. Reviewing progress on the actions quarterly will allow us to keep track of the short and long-term implementation, progress and outcomes of each action. Annually, the council's greenhouse gas emissions report will be reviewed to see the reduction in our overall carbon emissions, monitoring our progress to reach our carbon neutral target.

It is important to note that this Plan is based on national policies and strategies at the time of writing. We hope that those policies and strategies will change over the course of this Plan to include higher, more ambitious standards and therefore some of our actions may be superseded.

## The Plan

The below table presents the actions the council will take to reduce its carbon emissions 2022-24. The plan has been divided into seven themes to categorise the actions. These themes are:

Theme	Goal
<b>Our ways of working</b>	To make climate action inherent in all the council's work by designing and updating our policies, strategies and governance with the climate emergency at their core
<b>Our service delivery</b>	To plan and deliver services to our residents in ways that reduce carbon emissions and prepare our district for future ways of living
<b>Our people</b>	To create a culture of climate action amongst staff and councillors in the workplace
<b>Our land</b>	To approach our land management with sustainable and climate-friendly best practices
<b>Our buildings</b>	To decarbonise our buildings and their operations to ensure they are fit for the future
<b>Our communities</b>	To guide and support the district's businesses, voluntary sector and communities to take action on the climate emergency
<b>Our partners</b>	To work in partnership to reduce carbon emissions across the districts and support county-wide initiatives, making a greater impact together

# Strategic Approach

This plan focuses on how we will reduce carbon emissions from our own operations to make us a carbon neutral council. Our approach to this work is guided by our data and five principles, outlined below.

## Our Data

Looking at our council carbon emission data from our baseline year 2019/20, around half of our emissions come from our four leisure centres, while over one third of our carbon emissions come from our waste collection services. It is vital that we tackle our leisure and waste emissions to make the biggest impact on our carbon neutral target, which is reflected in specific actions in this Plan. Other emitters include staff and councillor mileage, our offices and properties, and other service contracts, which are also addressed in actions in this plan.

In addition to the quantitative data, we have used qualitative data to develop this plan, including feedback from the Corporate Plan consultation with residents in August 2020, where the climate emergency featured heavily, and from discussions on taking climate action at the Town and Parish Forums held in May 2021.

## Our Principles

This Plan is guided by five principles, which we will embed in our approach to climate action as an organisation and were used to develop the actions in this plan. We will use these principles as a benchmark for future plans and policies we develop and will also use them to inform current projects. The five principles are:

<b>Political commitment to climate action</b>	Political will locally and regionally to drive reductions in carbon emissions is critical in the absence of a statutory duty on local authorities to take climate action. This commitment is evident at Vale of White Horse through the dedicated position of a cabinet member for climate emergency and environment. This position has a responsibility to ensure that this commitment is embedded across all actions and plans and that climate implications in decisions are considered and examined. Driving forward this commitment to climate action will be vital going forward to make progress on our carbon neutral targets.
<b>Putting climate action at the heart of our decision making</b>	Having climate considerations at the core of our decision making, policies and ways of working is vital so that we create an organisational culture that lasts not just during the lifetime of this Plan but beyond.
<b>Working in partnership across the districts and county</b>	Climate Action needs everybody. We acknowledge that we cannot do this alone and there is collective strength in working in partnership to make a greater impact regionally, by pooling our resources and influence together.
<b>Commitment to inclusive engagement</b>	Addressing the climate emergency is a continual process and we need to ensure that our ongoing climate actions and communications meet the different needs of our communities and environment and are accessible and engaging for all.
<b>Influencing and providing advice</b>	Our engagement opportunities and activities are two-fold: influencing our government to lobby for national changes required to help us achieve our targets and providing advice to our communities, including our residents and businesses, to support their climate action journeys.
